DETAILED ACTION

1. This action is responsive to communications: Appeal Brief filed on 04/24/2006.
2. Claims 1-20 are pending in this case. Claims 1, 10, and 19 are independent claims.
3. The rejection of claims 1-20 under 35 U.S.C. 103(a) has been withdrawn due to persuasive arguments presented in the Appeal Brief filed.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please amend the paragraph in the section titled "Cross Reference To Related Applications" with the following amendments:

Priority is claimed from U.S. Provisional Application No. 60/311,857, filed August 13, 2001. Cross-reference is made to U.S. Patent Application Serial No. 09/543,962, entitled "Meta-Document And Method Of Managing", and U.S. Patent Application Serial No. 6,868,411 ~~09/928,619~~ entitled "Fuzzy Text Categorizer", which are both hereby incorporated herein by reference.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 10, and 19, none of the references, either singularly or in combination, teach or suggest to a person of ordinary skill in the art at the time of the invention the amended features, "...enriching the document content, at an insertion point that identifies a processing stage of the print command invoked from the print client interface, with a personality identified by the personality identifier to define enriched document content." The examiner notes that while customizing document content to a personality at time of print in itself is not novel (See Examiner Referenced Patents), but in combination with the other limitations of the method steps and system functions of the independent claim (i.e. enriching the document content, at an insertion point that identifies a processing stage of the print command invoked from the print client interface, with a personality identified by the personality identifier to define enriched document content) the limitations of claim 1 are considered novel, and unobvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
